

Mid-Sized Construction Co.

Case Study: Improving Safety, Reducing Costs

29% Premium Reduction

30%* Incident Frequency Reduction

25 Admin Hours Saved / Week

Our case study focuses on one west coast, mid-market framing company.

Their management needed a better way to monitor employee engagement and enforce safety compliance across multiple job sites.

Also, the owner and safety manager recognized the need for a Workers Comp Provider Company that understood their industry.

Solution:

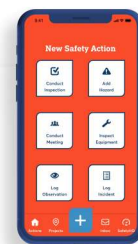

Foresight's Workers' Comp Insurance.

Together with **Foresight** and **Safesite**, this framing company has significantly improved employee safety engagement and reduced risk on the job by digitizing safety processes like meetings and inspections in the field.

DRIVE DOWN COSTS BY IMPROVING SAFETY

- **Insurance:**
Their active safety engagement led to an additional 29% savings on their already competitive workers' comp renewal rate.
- **Safety:**
The Safety Manager estimates Safesite saves their company:

\$1,500 in operational expense by digitizing their workflows

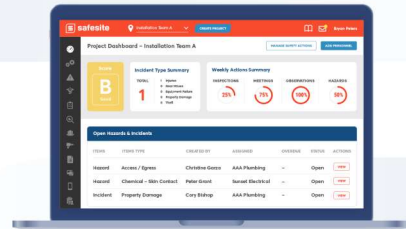

Safesite's easy-to-use safety management solution helps clients digitize safety workflows, enhance safety engagement, and reduce incident frequency.

It's rare that a business product or service is as they say in the pitch. Other insurers had a platform, but not as neat or developed as **Safesite**.

Safesite has helped digitize inspections and make them second nature.

*Results not typical. 18% Foresight Average

How has Safesite Improved the Way You Work?

Safety Director

- Complete reduction in paper reporting
- Made safety more efficient & reliable
- Moved us forward with the times; there are a lot of platforms out there, but nowhere near as evolved
- Made taking safety pictures and timestamping easy

Saves 25 Admin Hours a Week

Site Safety Manager

- Work is easier with the Safesite app's helpful pictures
- We can now communicate hazards immediately
- We have better proof and accountability in our safety actions
- Reduced 5 binders of paperwork
