

Your vision. Our Foresight.

There are many risks your hardworking clients confront every day by simply running their business. Keeping one of their most valuable assets – their people – safe from workplace accidents shouldn't be one of them.

Learn how Foresight can help customers in core industries drive down claims and business costs through our groundbreaking approach to workers' comp insurance.

See the future of workers' comp
with Foresight.

Many safety-critical businesses face unique risks that can make it difficult for them to secure the insurance they need. At Foresight, our mission is to provide leading-edge, cost-competitive workers' compensation insurance so that you can serve clients in even the most challenging industries.

.....● How do we specialize?

For core industries

We write 660+ class codes including construction, manufacturing, agribusiness, and landscaping and tree care.

For safety-critical business

Does this include what most people would call "high hazard"/high ex-mod accounts? **Yes**. Where most of your workers' compensation carriers give you the runaround, we say "let's see the account."

For high ex-mod accounts

We have a particularly strong record with higher ex-mod accounts given our **Safesite** program and ability to leverage proprietary data and account-by-account underwriting approach.

.....● How do we differentiate?

Through the power of our Safesite technology, Foresight's policyholders experience an average **18% claims frequency reduction** in their first policy year alone.

When our founders lost a friend in a workplace accident, it sparked a passion for safety that led to the creation of Foresight.

Unlike other insurance companies, we are uniquely purpose-driven — combining award-winning safety tech, data-informed underwriting, and a holistic approach to risk consulting to help ensure that more of your clients' **workers get home safe** at the end of their shift.

No call centers here. White glove approach, first-name basis, with a **dedicated underwriter** quarterbacking your sales relationship and **each account**; and a **Safety Success Manager** as a go-to for your client's safety engagement experience.

● The Foresight experience

From quote and pre-bind, to policy issuance, to the unlikely event of a claim, you and your clients are supported by our **streamlined processes and personal approach.**

For quotes

Tech-driven as you should expect from the insurer of the future, with competitive pricing informed by data and factoring in each individual account's specific risk factors. No ex-mod-only decision making here.

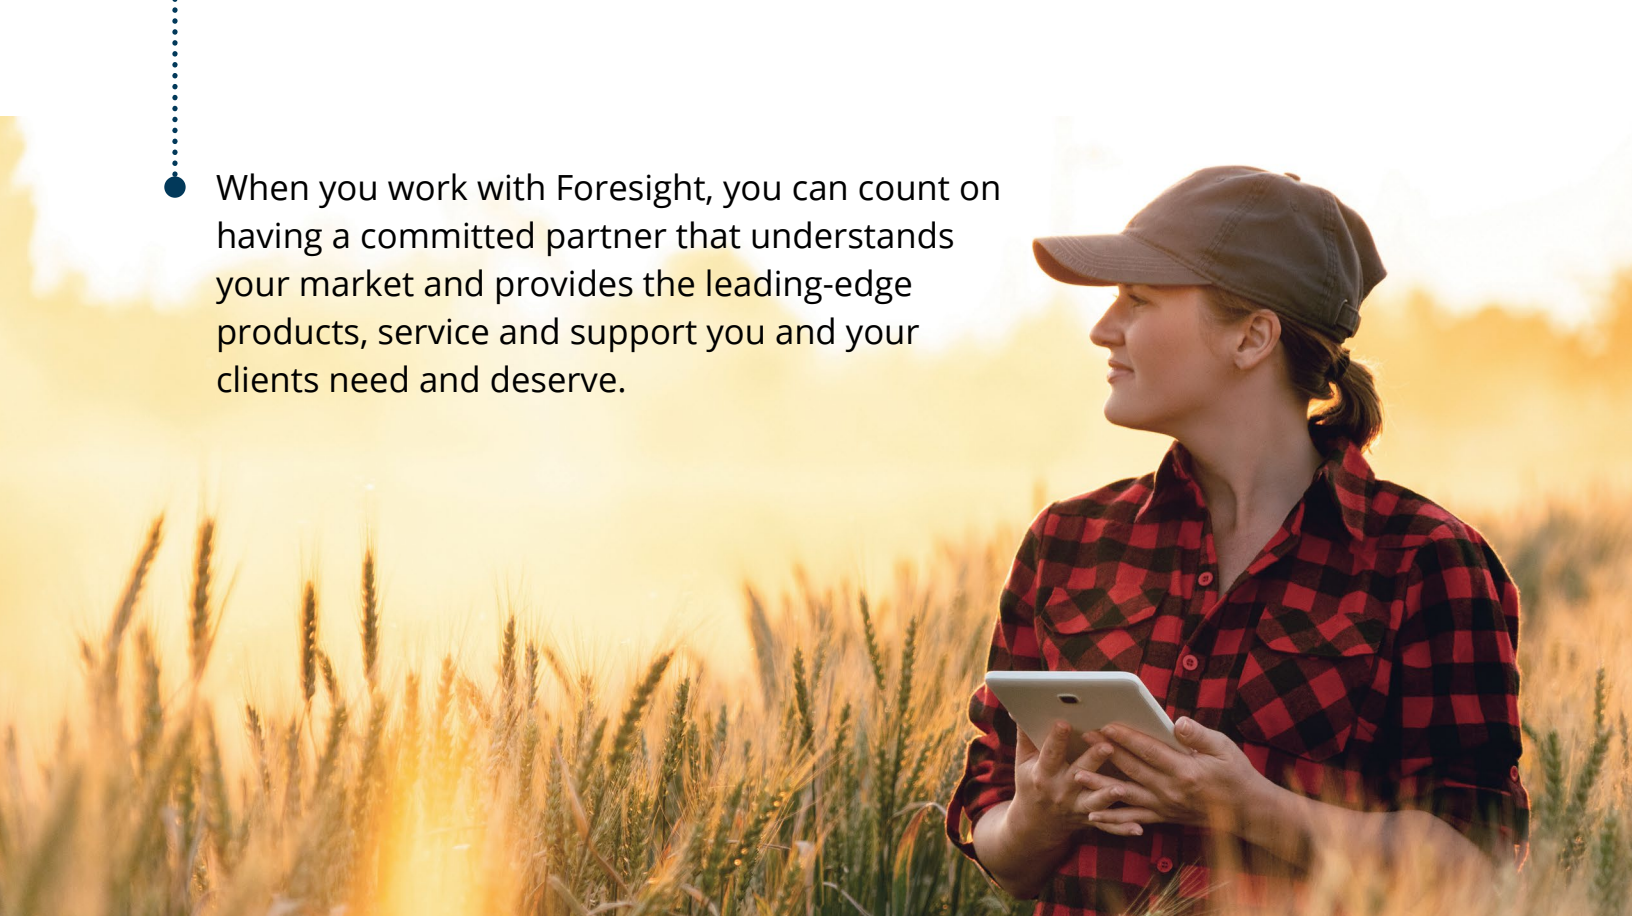

For pre-bind

The power of Safesite—the industry-leading safety management platform and coaching service — comes to life. Your client meets with our Safety Success Team for a 360 check-in to understand how we can best put our safety engagement program to work for their business. Workers' comp with Foresight is so much more than a piece of paper — and our 18% claims frequency reduction is proof. **The best claim is the claim that never happened.**

For claims

With dedicated bilingual (Spanish-speaking) claims adjusters, quarterly claims reviews and 25% lower caseloads by adjuster, we are moving the needle on providing winning service to our clients when they need us most.

- 
- When you work with Foresight, you can count on having a committed partner that understands your market and provides the leading-edge products, service and support you and your clients need and deserve.

For growing your business

Foresight uses predictive modeling and your client's real-world safety engagement behavior to demonstrate how Safesite technology might impact your client's ex-mod and performance over time.

Foresight is building partnerships with brokers in all states where we do business — and we are expanding into new states throughout 2023.

We are ready to work with you to bring the future of workers' compensation solutions to your clients today.
